STATISTICS

An Official Journal of the
Institute of Mathematical Statistics

VOLUME 35

2007

CONTENTS OF VOLUME 35

Articles

ABRAMOVICH, FELIX, GRINSHTEIN, VADIM AND PENSKY, MARIANNA. On optimality of Bayesian testimation in the normal means problem 2261–2286

AÏT-SAHALIA, YACINE AND JACOD, JEAN. Volatility estimators for discretely sampled Lévy processes 355–392

ANDREWS, BETH, DAVIS, RICHARD A. AND BREIDT, F. JAY. Rank-based estimation for all-pass time series models 844–869

ARTILES, LUIS, BUTUCEA, CRISTINA AND GUŢĂ, MĂDĂLIN. Minimax and adaptive estimation of the Wigner function in quantum homodyne tomography with noisy data 465–494

AUDIBERT, JEAN-YVES AND TSYBAKOV, ALEXANDRE B. Fast learning rates for plug-in classifiers 608–633

BAKIROV, NAIL K., SZÉKELY, GÁBOR J. AND RIZZO, MARIA L. Measuring and testing dependence by correlation of distances 2769–2794

BALABDAOUI, FADOUA AND WELLNER, JON A. Estimation of a k-monotone density: Limit distribution theory and the spline connection 2536–2564

BANERJEE, MOULINATH. Likelihood based inference for monotone response models 931–956

BANERJEE, MOULINATH AND MCKEAGUE, IAN W. Confidence sets for split points in decision trees 543–574

BARTROFF, JAY. Asymptotically optimal multistage tests of simple hypotheses 2075–2105

BAYARRI, M. J., BERGER, J. O., CAFEO, J., GARCIA-DONATO, G., LIU, F., PALOMO, J., PARTHASARATHY, R. J., PAULO, R., SACKS, J. AND WALSH, D. Computer model validation with functional output 1874–1906

BELOMESTNY, DENIS AND SPOKOINY, VLADIMIR. Spatial aggregation of local likelihood estimates with applications to classification 2287–2311

BEN HARIZ, SAMIR, WYLIE, JONATHAN J. AND ZHANG, QIANG. Optimal rate of convergence for nonparametric change-point estimators for nonstationary sequences 1802–1826

BERGER, J. O., CAFEO, J., GARCIA-DONATO, G., LIU, F., PALOMO, J., PARTHASARATHY, R. J., PAULO, R., SACKS, J., WALSH, D. AND BAYARRI, M. J. Computer model validation with functional output 1874–1906

BERRENDERO, JOSÉ R., MENDES, BEATRIZ V. M. AND TYLER, DAVID E. On the maximum bias functions of *MM*-estimates and constrained M-estimates of regression 13–40

BICKEL, PETER J. Discussion 2352–2357
BRAESS, DIETRICH AND DETTE, HOLGER. On the number of support points of maximin and Bayesian optimal designs 772–792
BREIDT, F. JAY, ANDREWS, BETH AND DAVIS, RICHARD A. Rank-based estimation for all-pass time series models 844–869
BROWN, LAWRENCE D. AND LEVINE, M. Variance estimation in nonparametric regression via the difference sequence method 2219–2232
BUCHMANN, BORIS AND CHAN, NGAI HANG. Asymptotic theory of least squares estimators for nearly unstable processes under strong dependence 2001–2017
BUNEA, FLORENTINA, TSYBAKOV, ALEXANDRE B. AND WEGKAMP, MARTEN H. Aggregation for Gaussian regression 1674–1697
BUTUCEA, CRISTINA. Goodness-of-fit testing and quadratic functional estimation from indirect observations 1907–1930
BUTUCEA, CRISTINA, GUŢĂ, MĂDĂLIN AND ARTILES, LUIS. Minimax and adaptive estimation of the Wigner function in quantum homodyne tomography with noisy data 465–494
CAFEO, J., GARCIA-DONATO, G., LIU, F., PALOMO, J., PARTHASARATHY, R. J., PAULO, R., SACKS, J., WALSH, D., BAYARRI, M. J. AND BERGER, J. O. Computer model validation with functional output 1874–1906
CAI, JIANWEN, FAN, JIANQING, ZHOU, HAIBO AND ZHOU, YONG. Hazard models with varying coefficients for multivariate failure time data 324–354
CAI, SONGHE, KOLTCHINSKII, VLADIMIR AND SAKHANENKO, LYUDMILA. Integral curves of noisy vector fields and statistical problems in diffusion tensor imaging: Nonparametric kernel estimation and hypotheses testing 1576–1607
CAI, T. TONY, JIN, JIASHUN AND LOW, MARK G. Estimation and confidence sets for sparse normal mixtures 2421–2449
CAI, T. TONY AND LV, JINCHI. Discussion 2365–2369
CANDÈS, EMMANUEL AND TAO, TERENCE. The Dantzig selector: Statistical estimation when p is much larger than n 2313–2351
CANDÈS, EMMANUEL AND TAO, TERENCE. Rejoinder 2392–2404
CARROLL, RAYMOND J., LI, YEHUA, WANG, NAISYIN, HONG, MEEYOUNG, TURNER, NANCY D. AND LUPTON, JOANNE R. Nonparametric estimation of correlation functions in longitudinal and spatial data, with application to colon carcinogenesis experiments 1608–1643
CARTER, ANDREW V. Asymptotic approximation of nonparametric regression experiments with unknown variances 1644–1673

CHAN, HOCK PENG, FUH, CHENG-DER AND HU, INCHI. Optimal strategies for a class of sequential control problems with precedence relations 1722–1748
CHAN, HOCK PENG AND LOH, WEI-LIEM. Some theoretical results on neural spike train probability models 2691–2722
CHAN, NGAI HANG AND BUCHMANN, BORIS. Asymptotic theory of least squares estimators for nearly unstable processes under strong dependence 2001–2017
CHAN, WAI SUM, ZHANG, LI-XIN, HU, FEIFANG AND CHEUNG, SIU HUNG. Asymptotic properties of covariate-adjusted response-adaptive designs 1166–1182
CHATTERJEE, SOURAV. Estimation in spin glasses: A first step ... 1931–1946
CHEN, JIANWEI AND ZHANG, JIN-TING. Statistical inferences for functional data 1052–1079
CHEN, SONGNIAN AND ZHOU, LINGZHI. Local partial likelihood estimation in proportional hazards regression 888–916
CHENG, MING-YEN, PENG, LIANG AND WU, JYH-SHYANG. Reducing variance in univariate smoothing 522–542
CHEUNG, SIU HUNG, CHAN, WAI SUM, ZHANG, LI-XIN AND HU, FEIFANG. Asymptotic properties of covariate-adjusted response-adaptive designs 1166–1182
CHI, ZHIYI. On the performance of FDR control: Constraints and a partial solution 1409–1431
CUEVAS, ANTONIO, FRAIMAN, RICARDO AND RODRÍGUEZ-CASAL, ALBERTO. A nonparametric approach to the estimation of lengths and surface areas 1031–1051
DAUBECHIES, INGRID, RUDIN, CYNTHIA AND SCHAPIRE, ROBERT E. Analysis of boosting algorithms using the smooth margin function 2723–2768
DAVIS, RICHARD A., BREIDT, F. JAY AND ANDREWS, BETH. Rank-based estimation for all-pass time series models 844–869
DELAIGLE, AURORE, HALL, PETER AND MÜLLER, HANS-GEORG. Accelerated convergence for nonparametric regression with coarsened predictors 2639–2653
DETTE, HOLGER AND BRAESS, DIETRICH. On the number of support points of maximin and Bayesian optimal designs 772–792
DICKHAUS, THORSTEN, ROTERS, MARKUS AND FINNER, HELMUT. Dependency and false discovery rate: Asymptotics 1432–1455
DOUC, R., GUILLIN, A., MARIN, J.-M. AND ROBERT, C. P. Convergence of adaptive mixtures of importance sampling schemes 420–448

DUROT, CÉCILE. On the $\mathbb{L}_p$-error of monotonicity constrained estimators 1080–1104
EFROMOVICH, SAM. Conditional density estimation in a regression setting 2504–2535
EFRON, BRADLEY. Size, power and false discovery rates 1351–1377
EFRON, BRADLEY, HASTIE, TREVOR AND TIBSHIRANI, ROBERT. Discussion 2358–2364
FAN, JIANQING, ZHOU, HAIBO, ZHOU, YONG AND CAI, JIANWEN. Hazard models with varying coefficients for multivariate failure time data 324–354
FINNER, HELMUT, DICKHAUS, THORSTEN AND ROTERS, MARKUS. Dependency and false discovery rate: Asymptotics 1432–1455
FRAIMAN, RICARDO, RODRÍGUEZ-CASAL, ALBERTO AND CUEVAS, ANTONIO. A nonparametric approach to the estimation of lengths and surface areas 1031–1051
FRIEDLANDER, MICHAEL P. AND SAUNDERS, MICHAEL A. Discussion 2385–2391
FUH, CHENG-DER, HU, INCHI AND CHAN, HOCK PENG. Optimal strategies for a class of sequential control problems with precedence relations 1722–1748
GARCIA-DONATO, G., LIU, F., PALOMO, J., PARTHASARATHY, R. J., PAULO, R., SACKS, J., WALSH, D., BAYARRI, M. J., BERGER, J. O. AND CAFEO, J. Computer model validation with functional output 1874–1906
GENEST, CHRISTIAN, QUESSY, JEAN-FRANÇOIS AND RÉMILLARD, BRUNO. Asymptotic local efficiency of Cramér–von Mises tests for multivariate independence 166–191
GEYER, CHARLES J. AND SUNG, YUN JU. Monte Carlo likelihood inference for missing data models 990–1011
GHOSAL, SUBHASHIS AND VAN DER VAART, AAD. Convergence rates of posterior distributions for noniid observations 192–223
GHOSAL, SUBHASHIS AND VAN DER VAART, AAD. Posterior convergence rates of Dirichlet mixtures at smooth densities 697–723
GINÉ, EVARIST AND MASON, DAVID M. On local U-statistic processes and the estimation of densities of functions of several sample variables 1105–1145
GLOTER, ARNAUD AND HOFFMANN, MARC. Estimation of the Hurst parameter from discrete noisy data 1947–1974
GRINSHTEIN, VADIM, PENSKY, MARIANNA AND ABRAMOVICH, FELIX. On optimality of Bayesian testimation in the normal means problem 2261–2286

GUILLIN, A., MARIN, J.-M., ROBERT, C. P. AND DOUC, R. Convergence of adaptive mixtures of importance sampling schemes 420–448

GUŢĂ, MĂDĂLIN, ARTILES, LUIS AND BUTUCEA, CRISTINA. Minimax and adaptive estimation of the Wigner function in quantum homodyne tomography with noisy data 465–494

HALL, PETER AND HOROWITZ, JOEL L. Methodology and convergence rates for functional linear regression 70–91

HALL, PETER AND MA, YANYUAN. Testing the suitability of polynomial models in errors-in-variables problems 2620–2638

HALL, PETER AND MEISTER, ALEXANDER. A ridge-parameter approach to deconvolution 1535–1558

HALL, PETER, MÜLLER, HANS-GEORG AND DELAIGLE, AURORE. Accelerated convergence for nonparametric regression with coarsened predictors 2639–2653

HALL, PETER AND QIU, PEIHUA. Nonparametric estimation of a point-spread function in multivariate problems 1512–1534

HALL, PETER AND YATCHEW, ADONIS. Nonparametric estimation when data on derivatives are available 300–323

HASTIE, TREVOR, TIBSHIRANI, ROBERT AND EFRON, BRADLEY. Discussion 2358–2364

HASTIE, TREVOR, TIBSHIRANI, ROBERT AND ZOU, HUI. On the "degrees of freedom" of the lasso 2173–2192

HE, HEPING AND SEVERINI, THOMAS A. Higher-order asymptotic normality of approximations to the modified signed likelihood ratio statistic for regular models 2054–2074

HENDRIKS, HARRIE AND LANDSMAN, ZINOVIY. Asymptotic data analysis on manifolds 109–131

HETTMANSPERGER, THOMAS P., HUNTER, DAVID R. AND WANG, SHAOLI. Inference for mixtures of symmetric distributions 224–251

HILLEBRAND, MARTIN AND MÜLLER, CHRISTINE H. Outlier robust corner-preserving methods for reconstructing noisy images 132–165

HOFFMANN, MARC AND GLOTER, ARNAUD. Estimation of the Hurst parameter from discrete noisy data 1947–1974

HONG, MEEYOUNG, TURNER, NANCY D., LUPTON, JOANNE R., CARROLL, RAYMOND J., LI, YEHUA AND WANG, NAISYIN. Nonparametric estimation of correlation functions in longitudinal and spatial data, with application to colon carcinogenesis experiments 1608–1643

HOROWITZ, JOEL L. AND HALL, PETER. Methodology and convergence rates for functional linear regression 70–91
